

Clean Air Parents' Network

**Are you concerned about the impact of air pollution on children's health?
Do you want to join forces with other parents and carers to clean up the air our children breathe?**

Join the [Clean Air Parents' Network](#).

The [Clean Air Parent's Network](#) is a national project run by [ClientEarth](#) and the [British Lung Foundation](#). We are calling on all levels of government to take action to tackle illegal and harmful levels of air pollution to protect the health of people across the UK.

Children across the UK are exposed to dirty air every day, with hundreds of schools across the country located near roads with illegal and harmful levels of air pollution.

Children's lungs are still growing and dirty air can stunt their lung development. This damage may never be reversed and could put them at higher risk of developing further health problems in later life.

Air pollution is a huge national problem but it can be solved.

We need to join together to let politicians know that they must take bold and urgent action to clean up the dirty air that our children are breathing.

[Sign up](#) to the Clean Air Parents' Network and become part of a national network campaigning for more action to be taken to tackle the harmful and illegal levels of air pollution so that children can breathe cleaner, healthier air.
